**Subject:** Fwd: Actual Survey for 85961 Edenvale Road and (b) (6)

Okay- so the demo guy contracted with another guy to haul the demoed trailer to the dump. The hauler and his adolescent kid were likely exposed to anything rendered friable.

The demo guy told the hauler the mobile home was clear of ACM and provided him with a dummy survey that had been cut and pasted from an actual mobile home survey that came back clear of ACM. The hauler presented the dummy survey to the landfill, but got turned away. The demo guy has admitted to someone in LRAPA that he falsified the survey...but I'm not sure who.

Anyway, there is a half demoed mobile home in an active mobile home park. Not sure of anything regarding friability or quantity.

SO - here it comes - LRAPA wanted to know what resources were available for cleanup but I don't know what big EPA can or can't do for a single mobile home half torn down with an identified RP nearby.

**Subject:** RE: Actual Survey for 85961 Edenvale Road and (b) (6)

Thanks Robbye,

I am attaching 2 pictures that I took of the asbestos survey that was delivered along with the load yesterday evening to Short Mountain. You will notice that it has been altered from the original survey and only contained the two pages that I have sent. The gentlemen that brought this load to Short Mountain yesterday was also doing the demolition on the structure. He was working under the assumption that the asbestos survey was negative and even had his kids at the site helping during demolition.

Please give me a call at my desk (541) 682-3899 or my cell phone at (b) (6).

Thanks.

**Subject:** Actual Survey for 85961 Edenvale Road and (b) (6)

All:

This email is in response to a call we received late today from Chad Ficek regarding material for disposal from 85961 Edenvale Road in Jasper/Pleasant Hill.

Attached is a copy of the full original survey done April 18, 2016 for 85961 Edenvale Road. Also, attached is a copy of the full survey done August 26, 2015 for (b) (6) provided by Lodge Environmental.

LRAPA staff took a picture of the one page 'survey' provided onsite Monday, also attached, and seems to have been fabricated by combining page two of each survey for the desired results of NAD. We would like to see the survey that was provided at the landfill if there is a copy since it was 2 pages and contained different information.

As you can see, asbestos was found in the roof paint and in the sealant/putty around the exterior windows and door at the Edenvale trailer which burned and demoed.

Thanks for catching this one. We will be in touch in the AM or reply to this email if you need to reach LRAPA staff before 8AM tomorrow.

Regards-

*Robbbye Lanier*
